

# Why Choose Fighting Blindness?

## Research. Counselling. Cures.

Fighting Blindness is an Irish charity funding world-leading research into treatments and cures for blindness. We also provide a unique professional counselling service for people with visual impairments and their families.

Finding cures for blindness will be one of the great human achievements of history and here in Ireland we're at the forefront of the race. The work of Fighting Blindness brings hope to the 65,000 children and adults in Ireland with degenerative eye conditions.

## Not a Trekker?

Can't get away for a Global Challenge? Then join us closer to home. We have many active challenges in Ireland for you to get involved in, from road races and marathons to skydives and weekend team challenges.

If you're not the active type, you can help fundraise in your community by hosting coffee mornings, cake sales or church gate collections.
